## School Week Fittingly Closed Here Last Friday

Many Visitors Attend And They  
Enjoy Programs

School week was brought to a very fitting close here last Friday afternoon when a large number of our citizens visited the school to witness a program in the high school and to inspect the other rooms in which they were most interested.

Sacred sister school was called to the afternoon session a program, consisting of a debate, a spelling match and a contest on current events was put on in the high school, while the regular routine work was carried on in the public school. The goodly number of parents present visited the several grades but the majority assembled in the high school for the program.

In the debate which was, "Resolved that the evils of modern machinery outweigh the advantages," Margaret Rutherford and Helen Rose took the affirmative, while the negative was upheld by Jim Brown and Albert Podolski. Considering this was their first attempt at public speaking, all four contestants did exceptionally well. So close was the contest that the judges were divided in their decision. The majority, however, were in favor of the negative and the decision was given that way. Rev. Pow, C. T. Hall and E. L. Stojie were judges.

The final for the public school spelling match championship was between four picked from grade seven and four from grade eight, and for the first time in the history of the school, the lower grade in the contest won out. The winning quartet for grade seven was composed of Geo. Ballentyne, A. Schaefer, Annie Bolton and Ellen Howe. Grade eight was represented by Jack Brydie, Edie Stratton, L. F. Knudsen and Flora Brucker.

The current event match between the boys and girls of the high school, proved most interesting and showed that both boys and girls had been reading the papers for the past month. The names of leading men and women of world renown were given by the principal and the pupils had to tell who they are and what positions they hold. It was a close contest, the boys winning out by one point.

Owing to the severe weather outdoor drills and games were called off by the pass-ball girls challenged the younger boys to a game. The girls showed great skill in this game and they won out by a narrow margin. Not content with this victory they challenged all the men present. With Rev. Pow as pilot, A. R. Ballentyne as coach and E. L. Stone as trainer, the men made what looked like a formidable line up, but the game was not long in progress when it was seen the men lacked speed, wind and foot work and were no match for the girls.

On the whole the afternoon was most profitably spent and was thoroughly enjoyed by all who attended.

## Medicine Hat Wins Badminton Tournament

Was Played on The Local Court  
Last Monday

The badminton tournament arranged between the Redcliff club and the Memorial Church club of Medicine Hat was staged on the local court last Monday night. Approximately twenty players came up from the Hat, and in all seventeen games were played, the visitors winning nine and thus defeating the local players by one game.

In the only game of ladies' singles played, Miss McWaine defeated the visiting contestant. In the men's singles, two games were played and both were won by Redcliff players, Thomson and Pow respectively. In the ladies' doubles all games were won by the Hat and in the men's doubles three of the games played were won by Ballentyne and Hagerman, and Thomson and Weeks and Schille and Wooding.

In the mixed doubles the Redcliff winners were D. Jensen and Miss McWaine, and C. Pow and Miss Frey.

The consensus of opinion was that while the Medicine Hat ladies were much stronger players than the local ladies, the Redcliff men were decidedly better than the visiting gentlemen.

There were at least 60 spectators on the side lines who thoroughly enjoyed the entire tournament.

Another contest between the two clubs will take place in the near future and will probably be played in Medicine Hat.

Mr. and Mrs. R. S. Hodge, who have been at the Pacific coast for the past six weeks, returned home last week-end. Mr. Hodge who underwent an operation while at the coast is now improving favorably.

Mrs. Scanlan and Mrs. Wilson, who are patients at the hospital are progressing as well as can be expected. Mrs. Scanlan has sufficiently recovered to enable her to return home this week.

There will be two hockey games here next Sunday. In the morning Suffield will be here for a game at 11 o'clock. In the afternoon at 2:30 there will be a game with Pipit. Both games will be well worth seeing. Don't miss them.

The St. W. A. of St. Ambrose Church will hold a bridge and whist tea in the Parish Hall on the afternoon of Wednesday, Feb. 22nd starting at 3 o'clock. The prizes, as usual, will be worth playing for. As this will be the last drive until after Easter it is hoped there will be a good attendance. Cards and tea 25c. Tea alone 20c.

**REDCLIFF TRAIN SERVICE**  
West Bound—No. 1 6:01 p.m.  
East Bound—No. 2 8:42 a.m.  
No. 4 10:27 p.m. Mixed, due 8 p.m. Thursday and Saturday.

An attempt was made on the life of President-elect Roosevelt last night. One bullet hit the Mayor of Chicago.

## Report of Local School For The Past Year

Was Prepared For The Annual Rate-  
payers' Meeting

The following is a statement of the attendance, organization and operation of the public and high school for the past year which was prepared by principal W. King for the annual rate-payers' meeting:

### Enrolment

The public school enrolment as at January 25th of this year was 201, and the high school enrolment was 44, making a total of 245 for the whole school. This constitutes an average of 30.62 for each of the eight rooms. The same situation exists here with regards the school attendance as in most other towns and cities, namely, a considerable overcrowding in the high school and a declining public school enrolment. In the past three years the high school enrolment has increased from 18 to 44, an increase of 145 per cent.

### Organization

Four of the teachers on the staff have a one grade room, the remainder are teaching two or more grades. High school work includes 20 units of grades nine, ten and eleven. There is no grade twelve work being taught this year, but it will be work of considerable hardship on some seven or eight senior students if the Board should offer at least four units of first year university work next year. This would in no way affect the general efficiency of the high school. Last year the Board offered grade twelve work none for the first time. Five students availed themselves of the opportunity to take one or more fourth year units, and all were successful in passing the final examinations. Of these five graduates, two are in training at the Calgary Normal School, one is in training at Mount Royal College and one has been accepted as nurse-in-training at the Medicine Hat General Hospital. This would indicate that Redcliff students generally are making the best possible use of the education offered them.

### Inspection

Inspector F. S. Carr made his annual inspection of the public school during the week commencing January 16th. Details of the result of this inspection will be found in his report to the Board.

As it is impossible for the two high school inspectors to pay an annual visit to all secondary schools in the province, there has been no inspection of the high school during the past year. It is expected, however, that either Inspector Smith or Inspector Fuller will pay an official visit this spring.

Through the efforts of the local branch of the Red Cross Society and with the approval of the Board of School Trustees, nurse Hagerman, of Medicine Hat conducted a medical inspection of the school between April 15th and May 19th last year. She reported that she found the school quite average with re-

gards to the physical fitness of the students. Of the 230 examined, 66 were recommended for further medical attention, and twenty of these had defective eyesight. The results of the inspection have been very gratifying. So far as can be ascertained 30 students had their teeth attended to, 8 had their tonsils removed and 8 obtained glasses. Six or seven attended the T. B. clinic. One under-nourished child was supplied with milk by the Red Cross Society.

### Conventions

The whole teaching staff was in attendance at the inspectorate convention held in Redcliff and Medicine Hat on November 9th and 10th. Three Redcliff teachers took an active part in the program. Redcliff students also took part in the program in Medicine Hat for the benefit of the teachers. Nearly 50 teachers from all parts of the inspectorate came to Redcliff to witness the demonstration teaching in the local high school. At the conclusion of the convention the principal of the Redcliff school was elected President and the local grade six teacher Vice-President of the South-Eastern Alberta Educational Association for the ensuing year.

### Fire Drill

Fire drill has been held once a month during the last term. In every instance all rooms have been cleared in less than five minutes. At the last drill the alarm was given unexpectedly and all pupils were clear of the building in 42 seconds.

### Examinations

Final examination papers provided by the department of Education were used in the public school grades as the basis of promotion last June. Slightly over 10% of the pupils were unsuccessful in passing, and were required to repeat the year's work. Over 90% of the students in the high school room were recommended for promotion in grades nine and ten. Of the senior students who were required to write the departmental examinations 63% passed in the junior high school room, and 100% passed in the principal's room. The grade 12 students obtained particularly high marks, one student obtaining an honor diploma with a perfect paper of 100% in trigonometry. Class averages in the senior high school room ranged from a low of 65% to a high of 91%, a record unequalled in the province of Alberta.

### General Remarks

In the interests of economy great care has been taken this year to reduce requisitions for school supplies to a minimum. Also, wherever possible, teachers on the permanent staff have taken charge of rooms during the absence of a teacher on account of illness, in order to avoid the necessity of engaging a substitute.

## Valentine Social Attracts Good Crowd

Held Under Auspices of Local  
Rebekah Lodge

The L. O. O. F. Hall was the scene of a very pleasant social evening on Tuesday Feb. 14th when the Vega Rebekah Lodge entertained their friends at a St. Valentine Party. About ten tables of whist and bridge were engaged in play from 8.30 to 10 o'clock when dancing became the order of the evening. The first prize in bridge went to Mr. Spence while the consolation was carried off by Geo. Abbot.

In whist Mrs. E. A. Oakland won the Ladies first after a draw, and Mr. L. Henderson won the gents first prize. The consolation for ladies and gents went to Mrs. D. McLachlan and Mrs. P. McDermitt respectively.

By the time dancing commenced a goodly crowd had gathered and all entered into the fun with great enthusiasm.

The orchestra composed of Geo. Thompson, and J. Schille provided the dancers with excellent music, generously responding to repeated encores.

An excellent lunch was provided at midnight, after which dancing was resumed until the small hours, when the guests pronounced the evening a decided success.

## Churches

### ST. MARY'S CHURCH

Celebration of Mass every Sunday of each month except first Sunday, at 8:30 a.m.

### JORDON MEMORIAL (UNITED) CHURCH

Pastor: Rev. R. Enkline Pow  
Sunday, Feb. 19th  
10 a.m. Church School.  
11:15 a.m. Morning Worship Subject: "The Seed Growing Mysteriously."  
7:30 p.m. Evening Worship. Subject: Attitudes of Christ. "Christ Passing."

To sense one's own failure and the Divine aid, is to become a Christian.

### ST. AMBROSE CHURCH

Rev. Malcolm Stewart, Vicar  
9 a.m. Holy Communion.  
10 a.m. Sunday School.  
1st and 3rd Sundays  
11 a.m. Choral Service.  
2nd, 4th and 5th Sundays  
11 a.m. Mattins and Sermon.  
7:30 p.m. Evensong and sermon.

## Local Hockey Team Plays Two Games

Although They Lost Both, Show  
Big Improvement in Play

During the past week Redcliff hockey team played two games and although they were defeated in both, all the players showed a marked improvement in their play.

Last Sunday they played their first small-town league game when they went to Suffield and played a picked team from that town and Medicine Hat. Those who saw it say it was well worth going to see, despite the fact that the sheet of ice was very small. Redcliff lost out by two goals to one.

On Tuesday of this week the local lads went to Medicine Hat and played the Grays. In the opening period it looked as though their chances were good for winning, as Mignault scored the first goal with a hot shot, shortly after the game opened.

Playing under artificial lights for the first time, however, appeared to dazzle the visitors and in the second period the Grays located twice. There was no scoring in the last period so the game ended three to one for the Grays. A return game will be played here soon.

A. Wallis of the Thelma district, was frozen to death during the storm last Wednesday. He had gone out with a boy to fetch some stock. It is believed the sledg upset as the horses ran home.

Mrs. F. Cann, Vega's representative to the Rebekah convention being held in Calgary this week left last Saturday for that city. She was accompanied by Mrs. W. Wheeler. Both will visit Mrs. Cann's son, Harold, for a few days before and after the convention.

The Followers Group of the C. C. T. entertained the Waello group to supper in the school room of the Gordon Memorial Church on Tuesday evening. The girls with their leaders Mrs. N. White and Miss Buchholz spent a very pleasant and profitable time together.

### JUST FOR FUN

From Old Germany

There was a young lady of Munich,  
Whose appetite simply was unich,  
"There's nothing like food,"  
She contentedly cooed,  
As she let out a tuck in her tunic

## Uncanny Machines Known As Verifier And Tabulator Used To Check Up Census Returns

Aided by machines that count with lightning speed and which exist nowhere else in the world the computing of Canada's 1931 census involves much more than a counting of noses and it will be some time yet before the work begun when enumerators called from house to house nearly two years ago is completed.

The census of Canada now being tabulated is the biggest job of its kind ever undertaken in this country. Were it not for two machines, invented and built by census officials, it would cost three times as much as it will to tabulate the information which will be published also. As it is, thanks to the almost uncanny mechanical devices, much more information will be furnished than it will be possible to publish.

The two machines are the verifier and the tabulator. The first detects errors and the second counts 240 different facts from individual cards at the rate of 240 cards a minute.

The data taken by the census enumerators is transferred to small cards by punching holes for each fact recorded. A hole is punched in the proper place to indicate the sex, age, religion, nationality, language, racial origin and other things of the person being counted.

This card is then sent to the verifying machine to check possible errors. The machine throws out cards on which conflicting pieces of information are recorded. For example, if a person's age is 25 and he is listed as a non-voter, under 21, the card is thrown into the discard bin and the checker for checking to correct the discrepancy.

If a man gives his racial origin as Jewish and his religion as Catholic, the card is rejected. If the sex is omitted the card is shot back. The machine of course cannot detect a straight error in a single fact, such as the wrong age, the wrong sex, or the wrong nationality.

Each card runs under a set of pins, 240 in number, one for each possible hole. The pins drop through the holes into a small basin of mercury. This at once establishes a contact, current, down through one pin across through the mercury and up through another. If under 22 possible erroneous or doubtful combinations of facts are present the electric circuit is broken and the card is thrown out. The electric contact in the mercury bath lasts only 1-200 of a second.

The tabulator is the only machine in the world which will count 240 separate facts at the same time. It, too, works with electric currents running through a mercury bath by means of the pins which drop through the holes. As each card passes through a pin drop through each hole, an electric contact is established for 1-27 of a second and each hole on the card is counted under its proper heading.

A large black board with 240 apertures under 20 headings in each of which a revolving counter works with white figures like an automobile speedometer is attached to the machine. When all the cards for a certain district have run through and have counted the board has a record of the number of persons of each religion, each age division, each racial origin, and the whole 20 classifications marked up.

The next step is to take a photograph of the board which makes the permanent record. The totals from the photographic records are then computed on an adding machine and figures by province and for the whole of Canada are announced.

But the machine does more than merely count. As the cards run through they are sorted into boxes according to the classification desired. They might first be sorted for age. Then after the work is through that order and the next result would give the number of persons of each sex, each religion, each nationality and so on in the city of Toronto, under 21, between 21 and 35 and so on. All sorts of cross-classification of this kind are being made.

The Census Bureau has three tabulating machines built especially for this job at a cost of about \$15,000 each. It takes three months to run the whole of Canada on 10,000,000 odd cards through the machines.

A. B. Thornton, mechanical superintendent for the Dominion Bureau of Statistics, is the inventor of the ma-

By Ruth Rogers

### The Barter System

Premier Bennett Seen Trend In That Direction  
Speaking before the House of Trade, Premier R. B. Bennett said in the early days trade was conducted by barter and that in our day some would like to return to that method.

There were many phases of trade. The rural population for the first time in the history of Canada, was smaller at present than the urban population. "We sometimes forget how vast a market we have in our own country for our products," he said. But despite Canada's magnificent resources, her export trade has shown a great diminution for a time. Eventually, however, through sacrifices, Canada had come back to fifth position as an exporting country.

There was no problem so great and so little understood as the railway problem which the prime minister said was "one of the greatest and darkest clouds hanging over our country."

There was a tendency sometimes to blame the east for the railway problem, but this was not right, since three great agencies had been guaranteed parts of the transportation system.

There was also hundreds of millions of dollars invested in harbor and canal systems—all built to maintain Canada's trade and for its protection.

### Fish Propagation In B.C.

Province Will Stock Rivers and Lakes With Fish

Marking British Columbia's first attempt to stock its streams with young fish instead of mere fry, the province is now planning for salmon propagation, by means of the provincial game commissioner, has announced plans for concentration of fish propagation at three centres.

Brown trout, rainbow trout and Scottish salmon will be reared in scientific feeding ponds located at Cowichan Lake, Qualicum on Vancouver Island and at Stanley Park, Vancouver. The young fish will then be released into the streams and lakes of the province for the sport of fishing. "Transportation will be made with the use of a new system of oxygen tanks which make it possible for long trips without danger."

### Check and Double Check

Ontario Town Has Found This System Is Costly

It cost the Town Council of Chelmsford, Ont., \$275.95, and then some to check and double check the books of town clerk H. J. Gratton and make the discovery the municipality owed that official three cents. And the corporation also loses a law-suit.

J. T. Dimes, auditor, won his action against the town for \$60 as his fee for auditing the books. The town refused to pay and called in a government auditor. Now they have a bill for \$185.55 plus \$10 expenses for the second auditor.

### Troubles Of The Editor

Most newspaper editors will appreciate this from the Act, Ontario, Press: "If the amount of advertising contracts were one-third the number of requests for free publicity that newspapers receive these days through the mails it would be considered that the 'correspondence' was turned." The newspaper bureau is the most overworked article around the office—Ottawa Times.

### ANOTHER OF THE MAPLE LEAF'S STALWARTS

Style No. 974 is designed in sizes 12, 14, 16, 18, 20 years; 36 and 38 inches bust.  
Size 4 requires 3 yards 14-inch with 1 1/2 yards 30-inch for blouse.  
Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap cloth carefully.

### How To Order Patterns

Address: Winnipeg Newspaper Union, 170 McDermott Ave., Winnipeg

Pattern No. .... Size .....

Town .....

### Spelled the Wedding

"How did the Jones's wedding go off?"

"Fine until the person asked the bride if she'd marry her husband."

"What happened then?"

"She replied, 'Do you think I'm?' and the groom, who was in a suit of lace, replied, 'I do'."

A man in Lithuania recently exchanged his wife for a photograph.

### Contract For Ties

Railway Contracts Given To Timber Operators In Thunder Bay Area

Timber contracts for the supply of more than 800,000 ties have been awarded to nearly a score of timber operators of Port William and Port Arthur during the past few days, assuring an active winter period of woods operations in Thunder Bay district.

In the neighborhood of 3,000 men will be given employment by operations in camps all over the timber belt, while thousands of ties will be bought by smaller contractors from settlers and farmers in outlying sections of the district.

Many new camps are being opened, operations are being resumed at those already existing, while some operators plan to continue work throughout the spring and summer months. Both the Canadian Pacific and Canadian National Railways have contracted for the ties.

### If People Spent More

Even Half Dollar a Day Would Speed Up Business

If the billion inhabitants of the planet had a dollar more a day the demand for merchandise would be so great all of the factories in the five continents would be unable to meet the demand. The British Commonwealth, said in an address at the open forum of the Jewish Community House, of Bessborough, Brooklyn, Mr. Campbell declared there had never been a more auspicious time for universal peace than now, and it was up to Great Britain and the United States to point the way. He warned that if the British Empire should be dissolved, world-wide chaos would result. "I don't believe we understand our neighbor any better than we understand ourselves," he said.

### Big Ranching Development

British Firm To Operate Large Packing Plant In South Africa

The British Lister Company, one of the largest importers of meat from South America, is starting immediately to establish its own meat packing plant in Southern Rhodesia, South Africa, in the centre of an extensive cattle-raising district, the London Daily Herald announces. This is expected, the paper added, to lead to such ranching developments in Rhodesia and the Transvaal.

The Tasty Meat Trust also has acquired ranching rights in the Transvaal.

### A Job For Hubby

A young bride from the Middle West wanted to surprise her husband with a gala dinner on the first anniversary of their wedding. She telephoned the fish dealer and asked about lobsters. She ordered two of them.

They were brought to her alive. The cook book was full of instructions about making lobster salad, but said nothing of the most important detail—how to kill them.

Dinner, she telephoned her husband, "Please come home on an earlier train. I have a pair of lobsters for dinner and you must bring their socks."

Road transport competition is causing heavy loss to railways in France.

Algerie spent more than \$7,000,000 on new highways last year.

## King George Is Proud Possessor Of Finest Collection Of Postage Stamps Of The British Realm

### Making Pocket Money

Small Post Collectors Paying Farms Boys In Alberta

Farm boys are finding weird trapping a profitable side line in the central Alberta district, earnings being very plentiful in these parts this winter.

Boys are able to catch half a dozen or so without much trouble, setting traps within a few hundred feet of their homes. Those who are going into it on a larger scale are reaping much richer returns. With eight traps, one boy caught 61 weasels in six weeks, and hopes to go well over the hundred mark before the winter is over. Another boy has a total of 30 skins to show for a month's work with traps and trick baits.

The weasels skins are selling for 70 cents, top price, according to the fur traders, who expect to average around 60 cents a pair for their entire catch.

Weasel skins to be the only game the trappers have are better than this season. Coyotes are somewhat scarce except in the more isolated parts. Skunk were plentiful during the summer, but few have been reported caught this winter.

One boy took jackrabbits while going after fur. He set out a dozen snares in a large field a short distance from town, and has caught 16 of the large bunnies. The family and neighbors have been dining frequently on rabbit meat and the boy says 10 to 25 cents a skin to keep him in pocket money. Bush rabbits are fairly plentiful.

### To Aid Mankind

Kinslein Proposes To Have Great Minds Unite On World Problems

A plan evolved by Prof. Albert Kinslein for "an international committee of the 20 greatest minds of the world to function in the best interest of mankind," had been sketched by Jacob Kinslein, of New York, managing director of the Jewish Telegraph Agency, a press association.

He said invitations would be issued engaged in scientific study at Pasadena, described the plan in a special interview.

"As Dr. Kinslein conceives it," Landau said, "the committee will render its voice whenever mankind is confronted with grave problems. It will take action whenever the peace of the world is jeopardized or in acts of injustice have been committed."

He said invitations would be issued "only to intellectuals of the highest order."

### Russia's Dream Has Vanished

Soviet Gives Up Idea Of Making Great Communist Empire

It would almost appear that Russia has despaired of China, and does not even see much hope of turning the government to Chiang Kai-shek to her own advantage.

Perhaps M. Stalin is beginning to realize that true Communism will never be appreciated by such convinced individualists as the Chinese. The great dream of adding China to the Union of Soviet Republics has vanished and the Communists have turned to realties and are evidently ready to compromise with things they do not like.—Hong-Kong Press.

### An Expensive Exhibit

Elephant In Seattle Zoo Eats Ten Or Eleven Weekly

Eating a ton of hay a week is the job of Tusko, huge (moosine) young elephant, who is now the "joy" in special quarters at Woodland Park Zoo, Seattle, Washington. About 100,000 people have seen the big fellow since he was left to the care of the city by his alleged owners. He formerly held extended stands at Portland, Olympia, Chablis, and Tacoma, after he was "dis-missed" from the big top when he became too expensive to cart around the country.

### A Dangerous Job

Several snakes at the London Zoo are regarded as operators with a deadly stare. They lost their eyes in accidents of various kinds. The keepers fitted them with glass eyes.

The only trouble is that every time the snakes shed their skin, the eyes pop out and have to be fitted back in again. Try that on a lion constrictor.

The figure of Christ of the Andes is 26 feet high, resting on a granite column 22 feet high.

South Africa has four aeroplanes.

## GROUND FOR HOPE

Great hope is felt that the World Economic Conference will solve the difficulties which are preventing business recovery; certainly its failure would be a sad commentary on the intelligence of those directing the course of world affairs. As yet, no agenda is available but in a general way its task is to provide formulae for the solution of our present difficulties. In advance, the United States has requested that the subject of war debts and tariffs be excluded from the agenda. It seems impossible to keep these out of the discussion, but the solution may be that the war debt problem will be settled independently prior to this conference, a consummation greatly to be desired. What then are the outstanding factors responsible for the world depression? The answer to this question seems to be a babel of voices each announcing its own pet theory.

Many and varied as these pet theories may be, one thing which is certain is that the number of those who are convinced that something is radically wrong with the system which allows existing conditions to drag on month after month with no noticeable attempt being made to remedy them, is gradually growing larger. There was a time not so long ago when criticism of what is now commonly referred to as "the system" was of a hushed and whispering nature. The average man on the street was afraid to talk too loudly or before too many people for fear he might be branded as a "Red." Today it is different. So glaring and so many are the abuses which have crept into the system, and so closely do these abuses affect the pocket book and the comforts of the average individual that he is not a bit backward in expressing his views.

For the same reasons nations especially debtor nations, and all governing bodies which are financially involved, are assuming the same attitude.

For these reasons there is

ground for hope that the approaching World Economic Conference will fearlessly approach and solve the many problems which are now of an international nature.

Those who attended the celebration of school week at this local school last Friday afternoon had occasion to feel justly proud of our school, our teaching staff, our pupils and our faculty. The school presented a clean, tidy appearance; the staff was courteous and attentive to visitors and conducted their work in the rooms in a very capable and convincing manner and the department and conduct of the pupils throughout the school were all that could be desired. In a word ratespayers may feel assured that Redcliff's sense of learning is in capable hands.

The grand total of Dominion, Provincial, Municipal and incorporated bonds in Canada this year is \$7,760,068,232. Just think of it, the interest alone on that amount is more than six times as much as the total federal revenue of Canada was when the men of today were going to school. It is no wonder we are being taxed for everything now.

A Board of Health down south of the line advises kissing on the back of the neck as a method of preventing the spreading of the flu. Probably the designers of ladies evening dresses had this in mind when they allowed for so much kissing space. Or as one lady remarked: "Here's where the girls get it in the neck again."

## Redcliff Reminiscences

Taber From Our File of February 14th 1914

Redcliff hockey club expects to run an excursion to Taber on Wednesday next, the special train leaving Redcliff at 4:30 and returning immediately after the game.

The local hockey boys beat Taber here on Tuesday by a score of 6 to 0. The exceptionally cold weather interfered greatly with the attendance at the game so the club is considerably in the hole as they had to guarantee Taber \$50. expenses money.

The Union Bible Class is giving a concert on Monday evening in aid of the fund for the families of the unemployed. The following have promised to sing: Mr. Blaine, Mr. Blatchley,

Mr. D. Smith, Miss McKay, Miss Sherwin, Miss Webb, Mrs. Johnson, Miss Fairbairn, Miss Woodcock, Mr. King. Mr. Gibson will recite and Mr. Alf Lang will give a Devonshire dialect reading.

The first missionary society in connection with the local presbyterian church was organized on Sunday evening. There were seventeen charter members. The officers elected were, Pres. Mrs. G. I. Gordon, First Vice Mrs. W. D. Watts, Second Vice Mrs. W. J. Fairbairn, Treas. Mrs. C. T. Hall, Sec. Mrs. A. Symon.

Mr. W. T. Lockwood has just purchased a fine new five passenger Chalmers six cylinder 60 horse power car. This is the most powerful machine in Redcliff at present.

The new theatre on Third street opened to the public last night with Eckhart's travelling show company presenting the drama "Bought and paid for." Mr. C. C. Totten is to be the manager of the theatre.

Redcliff's building permits for 1933 showed an increase of \$1,005 and this figure does include the \$150,000 glass plant, the \$100,000 rolling mills or the \$30,000 shoe factory. Only two other places in western Canada showed an increase. These were Medicine Hat with 42% and Kelowna B. C. with 47%.

and Delivered

## An Inelastic Law

One Relating To Jury Duty Could Be Improved On

A short time ago in Ontario a man called for jury said it would throw 25 men dependent upon him temporarily out of employment. The judge refused to excuse him. It is a common sense that at this time of all times nothing should be done to hamper employment. It is also common sense that there are thousands of men capable of discharging the duty of juror in a completely satisfactory manner, whereas there are relatively few men whose presence is necessary in order to keep 25 men in employment. A system which is not sufficiently elastic to permit making exceptions which intelligence suggests is not good enough. The judge's decision emphasizes the necessity to make the law applicable to conditions as they are at the moment—Calgary Alberta.

## For Farm Relief

United States Senator Has New Plan To Aid Adjustment

A possibly far-reaching new element was introduced into the United States congressional farm relief drama as Senator Brookhart, of Iowa, declared in favor of a "war emergency" plan which he said William C. McAdoo, California's senator-elect, was considering.

He described the McAdoo plan as calling for agricultural price-fixing by federal law and for governmental control of the surplus.

Because of a belief the scheme would be vetoed by President Hoover, Brookhart said it is not planned to bring it forward for action until the next congress meets in the spring.

## New Treatment

United States Investigator Reports New Remedy For Pneumonia

Dr. Edwin B. Ziegler, of the United States veterans' administration, reported discovery of new treatment for pneumonia.

The treatment, a substance called "pneumocholin," has been found capable of building up immunity in rabbits against "type one" pneumococci, so that they are able to cut attacks of this disease which ordinarily would prove fatal, says Dr. Ziegler, in the administration's medical bulletin.

Pneumocholin is produced by dissolving gas (mucoid)—pneumococci—in sodium laurate solution, derived from bile.

## Holidays For This Year

Most Of Them Fall On Saturday Or Monday

Holidays occur 1933 as follows: Good Friday, April 14; Easter Monday, April 17, which is only a bank holiday; Victoria Day, Wednesday, May 24; Saturday, June 3; King's birthday, which is not generally observed in Canada as yet; Saturday, July 1, Dominion Day; Labor Day, Monday, September 4; Remembrance Day, Monday, November 11; Christmas Day, Monday, December 25.

Thus there will be six days in the Thanksgiving Day to be declared later. It will be noted that most of the holidays occur on Saturday, Sunday or Monday this year, which gives long weekends for gadding.

## Victim Of Swindle

Says Former German Kaiser Bought Bogus Statue

When former Kaiser Wilhelm paid 1,000,000 marks for a statue of the mythological queen of the underworld, says a noted Italian professor of ancient art, he became the victim of a colossal swindle.

The statue, which depicts Persephone, a major Hellenic goddess and consort of Pluto, and which now is in a Berlin museum, is said by Professor Eduardo Gull to not be genuine.

Wilhelm bought the work before the war in the belief that it was the handiwork of an artist living in the fifth century before Christ.

## An Unfinished Story

In 1909 Clarence House New started writing a serial story for a magazine called "Pee Lances In Diplomacy." It has run continuously nearly every month since then, but it will never be finished. New died suddenly January 15, at the age of 71.

Eight Pacific type locomotives in England have travelled a total of 4,550,618 miles.

Mario Antonietti was imprisoned for more than a year before her execution.

## A Queer Hobby

Cleveland Pastor Has About 18,000 Pictures Of Locomotives

Ever since the Rev. James H. Dean, pastor of the Brooklyn United Presbyterian Church in Cleveland, Ohio, watched Pennsylvania Railroad trains thunder past his house every day when he was a little boy in Xenia, Ohio, locomotives have held a strong fascination for him.

Nothing particularly remarkable about that, is there? Who has not felt a thrill at sight of a giant snorting "iron horse" galloping by with rhythmic clackety-clack over the narrow bands of steel rails?

But the Rev. Mr. Dean turned his admiration into a hobby. He began collecting in 1908. And any thought that this is a hobby that won't last is promptly put to rest by a glance at his big filing cabinet which, he says, contains between 18,000 and 18,000 locomotive pictures. All are as carefully arranged as a biologist might classify floral specimens.

Nothing particularly remarkable about that, is there? Who has not felt a thrill at sight of a giant snorting "iron horse" galloping by with rhythmic clackety-clack over the narrow bands of steel rails?

## CANADIAN SOCIETY ORGANIZED TO FOSTER ARTS AND LETTERS

A new organization to be known as the Canadian Society for Literature and the Arts, and designed to exercise a cultural and educational influence has just been organized. Its object is to promote a greater knowledge of literature, history and the arts, with particular emphasis upon Canadian efforts in these directions. Above are some of the leaders in this new society. The Patron is His Honor Dr. H. B. Bruce (1), Lieutenant-Governor of Ontario, President, Professor Arthur Edgar (3), of Victoria College, Toronto; Vice-President and Chairman of the Council, John M. Eisen (1), well known author, journalist and lecturer, Second Vice-president, Dr. B. J. Pratt (3), of Victoria College, well known Canadian poet. Organizing Director, Miss Ethel W. Rogers (3), Toronto. Photo of Professor Edgar by Violet Keene of Ekona Studio, Toronto.

## Profanation Wrong

Blood-Transfusion Benefits and Does Not Weaken Donor

The popular notion that blood-transfusion weakens and injures the donor of the blood was exploded at London by the revelations of P. L. Oliver, honorary secretary of the Blood Transfusion Service of the British Red Cross.

This service consists of about 1,250 men and women, ranging in age from 18 to 60, who are attending London hospitals regularly to give blood to perfect strangers. On an average seven donors per day are supplied, but more than a score have been sent on a single day.

Oliver says that it is extremely rare for a donor not to be back at his or her work within an hour after the transfusion.

"No fear as athletes are concerned," he stated, "some young men particularly ask for transfusions on Fridays or Saturdays, as it induces such a feeling of fitness for football, hockey or running."

Miss Amy Gentry, who recently won the Women's Amateur Rowing championship of England in a regular donor, her last transfusion having taken place ten days before competition.

Drum Not For Sale

Curio dealers in London and New York are reported to have offered up to \$200 for the huge drum which the Prince of Wales thumped on his recent visit to Northern Ireland. The Prince got the drum sticks as a memento, but the drum is not for sale.

"Dear Mr. Editor—Will you please read the enclosed short story carefully and return it to me with your candid criticism as soon as possible, as I have other ones in the fire."

"Dear Sir—Remove iron and insert short story."

Glasgow, Scotland, has a war on dog racing.

## Monsoon Is Important

Regulates Amount Of Rain Which Falls In India

The monsoon, which sweeps across the Indian Ocean during the season from the end of May to September is one of the most important factors in India's prosperity.

Nearly the whole amount of rain which falls in India during the year comes in the monsoon, and if the downpour fails Indian peasants and farmers have their crops ruined. Anxiously they wait every year for the heavy clouds to burst, when the wind has rolled them across the Arabian Sea to India.

In the early days of navigation the Arabs and the Eastern voyagers who first sailed the Indian Ocean, depended on the monsoon, and the early European trading companies regulated their voyages to the East according to the monsoon.

Today military strategy has been reversed, the monsoon, which is really a reversal of the normal winds over the ocean.

In the Arabian Sea the normal wind is the northeast trade wind, but actually it blows only in the cool season. When the sea is overcast in the north of India a depression develops in the northwest. As a result, the southeast trade wind blows over the ocean and then circles round the center of depression or low pressure, reaching India as a southwest wind.

Famous Brothers

The late Lewellyn Oeler, who died recently in London, was the last of the famous Canadian generation of Oeler brothers—Sir William Oeler, the greatest modern authority on medicine; Dr. B. Oeler, famous criminal lawyer; Sir Edmund Oeler, financier; Hon. Featherstone Oeler, the Judge; and the noted Edward Oeler being the others.

A survey of 10,000 rural homes in 33 states show that 67 per cent of the women on farms never have vacations.

## History Marked By Bells

London's Great Guns Made In Famous Whitechapel Foundry

Every gunner's event in the magnificent pagoda of English history has been marked by the solemn chiming of some great bell. The birth of kings and their coronations, national funerals, and the execution of traitors—all have been marked by the sounds of some bell made in the famous Whitechapel Foundry.

From these came the great cathedral bells of England—Canterbury, Winchester, Durham, Wells, Southwark, and St. Paul's. There was made the famous "Great Tom" of Lincoln, weighing 23,000 lbs.

In the fifteenth century courtyard here bells are lying in chains, bells which must have chimed the bells of Queen Elizabeth.

In the great foundry, where a craft is preserved that has been handed down since the days of the Crusades, here bells which must have chimed the bells of Queen Elizabeth.

People Must Be Careful How They Handle Technology

Technology is an ugly word, but its exponents have the beautiful idea that an efficient, modern, scientific world will not be. Unfortunately, the technocrats do not know how means can be served during alterations.

The danger is that some day technology will become a party and nominate people for things and act solely. Worst still, it might be what the next great war is to make the world safe for—The New Yorker.

## Sacrifice To Naval Treaty

Japan Has Turned Big Battle Cruiser Into Trading Ship

The battle cruiser "Hiei," Japan's sacrifice to the 1920 London naval treaty, shorn of her big guns, has become an innocuous trading ship at the gunnery school Yokosuka, Japan. The "Hiei" belonged to a class of four 26,500-ton ships which carried the most formidable gun armament. The 1920 pact, which doomed five of Great Britain's capital ships and three of America's, stipulated that the "Hiei" should be stripped of offensive power.

Scheme Was Successful

Low-Yare Excursions Net \$300,000 For Canada's Railways

If the operations of Canadian railroads proved as successful as the low-fare excursions experiment of the past year, Canada would have no railway problem. A. A. Gardner, assistant general passenger traffic manager, C.N.R., stated in an address at Montreal. These special excursions had netted the Canadian Pacific and Canadian National Railways approximately \$200,000, about half of this sum going to each line.

The night hawk migrates the farthest distance of all the land birds, from Yukon to Argentina, 7,000 miles away.

## Depression And Family Life

Unemployed Husband Should Not Spend Too Much Time At Home

Unemployed husbands are warned not to stay home too much and their wives are cautioned not to punish their nervous husbands in a revenge. "What the Depression Is Doing To Family Life," issued by the United States Committee for Mental Hygiene.

When the breadwinner loses his job, the report says, "there is often seen a landslide in the other members of the family to throw blame on the father for the dilemma in which they find themselves. He usually reacts in one of several ways. Sometimes he gives in and adopts a hanging air."

On the other hand, he often develops numerous symptoms of apparent physical disease (headaches, general weakness, vague pains here and there) for which, however, the most careful medical examination fails to disclose any adequate physical cause. However, his mind does not deliberately and intentionally manufacture his symptoms of illness.

"Psychological help," the report adds, "should not be spent as much time at home. There is sometimes a marked increase in hostility toward the father when he spends too much time at home. He begins to function more actively in the domestic scene. His presence at unusual hours tends to upset domestic routine and to show many of the usual daytime customs of the family out of gear."

On the other hand, the report adds, evidence "there is less juvenile delinquency at present because unemployed fathers are spending more time with their children at home."

## Must Pay The Fiddler

View Of United States Paper On Wheat Preference

The British Chamber has ruled that Canadian wheat shipped through American ports cannot be given inferior preference unless some scheme for "high tariff of inland" can be worked out, which nobody seems to think likely. Consequently, Canadian wheat, which has moved through Baltimore one year to the tune of 15,000,000 bushels, will avoid our elevator, Stewart Henderson, who is traffic manager of the Baltimore Chamber of Commerce, concludes from this that "who can play at the same game in this tariff business." This is a vice conclusion, and one too commonly ignored by our politicians, who appear to think that America can let itself be manipulated by the facts of war debt and pursue a reckless economic policy generally with no regard to reprisal.

With Ottawa as on fruit of that confidence, and the grain elevators of Baltimore are among those who may pay the price of that confidence, the time of economic nationalism—Baltimore Sun.

Autogro As Fire Fighter

Tests Show It Well Suited For Forest Fires

The autogro airplane has found a place in fire patrol of Pacific Northwest forests.

Tests conducted during the past five seasons showed the autogro well suited for forest patrol purposes because of its ability to hover over the trees, to get in and out of canyons and land and take off on small fields.

Planes constructed for forest service use will make flights from Seattle or Wenatchee in Washington. Since 1918 the forest service has used aeroplanes for forest fire scout duty.

Still Proving Useful

Ninety-Two Year Old Grandfather Is Now Cubicle

A circular gridlines which once hung at the bedside of John, a man, has at the age of 92 years become a common cubicle.

In 1911 the dome which was being used at the Boyd windmill got broken after 44 years' service. From 1884 until last September's blow down at the entrance to the mill. Recently, when a small park was laid out, the dome was used as a cubicle.

"Madam, this morning when I bathed I found, 'Till's a maul-trunk in the bathroom. I can't wash my back with a nail-brush."

"Lend me—'Till, you've a tongue in your 'eck, aren't you?"

Lodge—"Yes, but I'm no swan."

There are approximately 11,000 motor vehicles registered in Britain. Of these 8,857 are passenger cars.
